A Milestone Year

What an unforgettable year at Rock River Community Clinic (RRCC)!

We welcomed terrific providers including Dr. Donald Williams, MD, Dr. Le'erin Voss, DDS, MPH, and Elizabeth Stevenson, APNP. We increased our medical visits by 104% and continued to serve as the only dental provider for families enrolled in Medicaid/Badgercare in Jefferson County. As you will read, we expanded our capacity for diagnostic and laboratory testing to include pap smears, blood draws, and colorectal cancer screening kits at our medical clinics. Perhaps most importantly, we continued to expand the number of bilingual staff (English & Spanish) to effectively serve the now over 70% of our medical patients who speak Spanish as their primary language.

Our most notable accomplishment was receiving our Federally Qualified Health Center Look-Alike designation (FQHC-LAL) through Health Resources and Services Administration (HRSA). This designation has been a goal since the formation of RRCC and, through benefits including higher Medicaid reimbursement, opportunities for loan forgiveness, Vaccines for Children (VFC), and 340B pharmacy programs, provides greater opportunity to expand, strengthen, and help sustain our services for the communities we serve.

This work is and will only be possible because of the consistent support of our donors & volunteers (past and present), and the tireless, passionate work of our entire RRCC dedicated staff. In public health, we talk a lot about the importance of early childhood development and creating a strong foundation for families to capitalize on these pivotal early years. We find ourselves at a similar infancy stage at RRCC -- filled with potential and hope, shaped and supported by the very communities we serve. I'm grateful to work alongside our staff, patients, and community partners as we grow and build our foundation at RRCC that makes tangible, meaningful, and sustainable differences in the lives of our patients, our staff, and our beloved communities.

The following report highlights more of this impactful work in hopes of your continued support in 2023.

With gratitude,

We provide cost-effective, comprehensive healthcare services so everyone has access to high-quality care. As a community-run and community-driven health center, all are welcome at RRCC.

With four clinic locations, our direct service area spans from Watertown to Whitewater, encompassing 13 zip codes from Jefferson, Dodge & Walworth Counties.

In 2022, we served 2,843 patients for a total of 5,970 visits between our medical and dental clinics, with 96% of our patients residing in our designated service area.

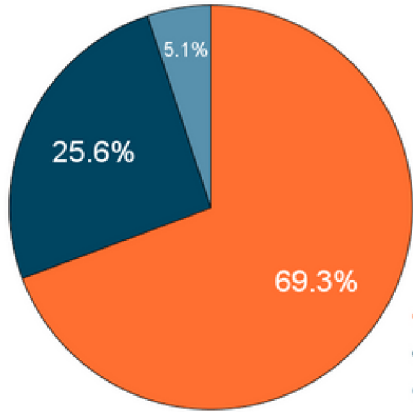

All RRCC clinics accept Badgercare and offer a Sliding Fee Discount Program for patients who are uninsured or underinsured (high deductible plan) with limited financial resources. Our medical clinics also accept Medicare and many commercial carriers which, like Badgercare, further helps offset the write-offs for patients enrolled in our Sliding Fee Discount Program.

2022 Patient Coverage	Medical	Dental
Medicaid/Badgercare	10%	86%
Sliding Fee Discount Program	84%	14%
Private Insurance	6%	0%

Hispanic/Latino Support

In 2022, the number of Hispanic/Latino patients at our medical clinics grew from 40% in June to over 80% by December. Particularly among new immigrant families, health needs have been substantial. We are proud and humbled to be a trusted site of care.

- Hispanic, Latino, or Spanish Origin
- Non-Hispanic, Latino, or Spanish Origin
- Declined/Unknown

*Thanks to our new dental software, collection of race/ethnicity for dental patients will begin in the summer of 2023

99% of all RRCC new patients have gone without healthcare for at least one year, some up to 17 years.

19.3% of our patients noted transportation as a barrier preventing them from receiving needed medical care - **an increase of 16% from 2021.**

"Our team helps patients work through the steps of getting the care they need. We can help them enroll in our Sliding Fee Discount Program to make care more affordable. We can also provide assistance applying for BadgerCare (Medicaid), connecting patients to our Prescription Assistance Program, and helping find transportation to and from appointments at our clinics."

Lilybeth Mallacoccio, Care Navigator/Financial Advocate

Reducing Barriers to Care

In 2021, we began using the evidence-based PRAPARE tool assessment, a nationally recognized survey for identifying and targeting social determinants of health, to help us better understand and address patient barriers to care.

For every new medical patient, our Bilingual Care Navigators work with patients to determine eligibility for financial assistance and use the PRAPARE assessment to help identify patient needs and connect interested patients to community resources and organizations (e.g., Ride United Program, WIC, Foodshare, etc.).

2022	PRAPARE Data Surveys
Quarter 1	59
Quarter 2	99
Quarter 3	185
Quarter 4	275

Increasing Access to Primary Care

Our experienced medical staff provides patients with the following services:

- Annual exams
- Immunizations
- Screenings
- Pregnancy testing
- Family planning
- Acute injuries or illness
- Diagnostic testing
- Lab services
- Basic orthopedics
- Gynecological care
- Chronic disease management

RRCC provides primary medical care for adults, children, and infants.

In 2022, we saw a **104% increase in patient visits** from 2021 and a **35% increase in unique patient count**.

Patient Data	2021	2022
Number of patients seen	821	1,155
Patients of Hispanic, Latino or Spanish origin	510	800
Patients Ages 0-18	54	149
Total Medical Visits	1195	2,443
Average # of visits/patient	1.45	2.12

“Our clinics have a huge impact on our communities. Without a primary care clinic, many of our patients would go without care until it's a crisis, and then their problem is much worse and much more difficult to treat.”

Mary Beck Metzger, APNP

Preventative Action

In 2022, we began offering pap smears and venipuncture draws within our clinic services, two crucially important diagnostic procedures that allow us to better identify and treat disease, and manage chronic conditions.

We also focused our efforts on increasing cancer screenings to better serve as a primary care home for our patients and families. In 2022, we increased the number of colorectal cancer screenings completed by 500%, and connected families with life-saving, early detection treatment options thanks to simple, preventative, diagnostic screening tools that are too often inaccessible and unaffordable.

➤➤➤ In 2022, we increased the number of colorectal cancer screenings completed by 500%

Prescription Assistance Program (PAP) Coordination

Through the Prescription Assistance Program, we help provide financially-eligible patients with access to free medications directly from pharmaceutical manufacturers. Once enrolled, medications range from \$60 inhalers to \$2,000/month insulins at no cost to the patient for at least one year. Our RRCC financial advocates, administrative staff, and medical providers all work collaboratively to assist our patients with the exhaustive process of applying for PAP, which in 2022, **led to medication cost savings for our patients of over \$380,000.**

Patients Enrolled	106
Total Meds Dispensed	245
Total Cost Saved for Patients	\$388,737.32
Most Popular Meds Ordered	Trulicity, Jardiance, Lantus
Most Expensive Meds Ordered	Promacta, Truvada, Abilify

"[The RRCC staff has] been beyond amazing in helping my daughter through her ITP diagnosis. From blood draws, to phone calls updating me regarding her lab work, to getting her the expensive meds that she needs (at no charge!). You guys are truly a blessing to my family... In my eyes, you are angels in scrubs."
--Mother of a PAP Patient

Increasing Access to Oral Health Care

Our experienced dental staff provides patients with the following services:

- Dental exams & imaging
- Hygiene cleanings
- Oral cancer screenings
- Periodontal therapy
- Restorative fillings & composites
- Endodontics/root canals
- Simple & Surgical extractions
- Crowns

RRCC provides family dental services for uninsured adults, children, and infants enrolled in BadgerCare.

RRCC is the **only** dental clinic in Jefferson County that accepts patients enrolled in BadgerCare/Medicaid.

Patient Data	2022
Total Number of Patients Served	2,414
Total patient visits	3,527
New patients served	114
Patients served with Medicaid/BadgerCare	2,077
Patients served that are low-income or uninsured	337
Patients served age 0-18	994
Patients receiving restorative care	1,679
Number of emergency visits	1,078

"I have been a patient of the dental clinic since 2016 and during that time I have been so pleased with the clinic on all levels. The dental care I have received for my teeth has been amazing...The staff are always so courteous, professional and accommodating to my needs...The doctors, nurses, dental hygienists and reception staff make me feel that I am important...I have my smile because of them."
 -- RRCC Dental Patient

“Prior to becoming a dentist I worked in public health and had the opportunity to champion oral health programs at the local and national levels. I realized that dentists can influence not only oral health outcomes but overall health and healthy habits. I love working at Rock River Community Dental Clinic and being a part of the solution to improve oral health and overall health outcomes.”

Dr. Le'erin Voss, DDS, MPH

40% of RRCC dental patients are children, including 25% of all emergency cases. Dental care for children enrolled in Medicaid (largest population of Medicaid beneficiaries) is a dire community need & state-wide challenge.

Patients with Special Healthcare Needs

Dental care for patients with special healthcare needs can be extremely challenging and cost-prohibitive. Thanks to our partnership with and support from Fort HealthCare, we completed 8 outpatient surgical services for adult patients with cognitive disabilities who are not able to receive dental services in a clinical setting. This surgical program and partnership have continued since 2016 and serve as a lifeline to families and a model for clinic and hospital organizations.

Patients served in 2022	8
Contribution Cost (RRCC & FHC)	>\$60,000

Within our RRCC clinic, we provided preventative and restorative care for an additional 171 adult patients with cognitive disabilities in 2022.

Updated Software & Sensors

Thanks to support from Wisconsin's Oral Health Program, the Fort Atkinson Community Foundation and Greater Watertown Community Health Foundation, we upgraded our dental software from PracticeWorks to Carestack, and began using digital x-ray sensors that allow us to take higher quality radiographic images and reduce processing time. These enhancements are not only essential for FQHC-LAL requirements, they help make our operations more efficient!

Revenue & Expenses

In 2022, RRCC wrote off over \$1.3 million in medical and dental patient service expenses, a cost that is only sustainable due to the generosity of our community partners and local foundations like Fort HealthCare, Greater Watertown Community Health Foundation, Fort Atkinson Community Foundation, Rock River Health Care Network, United Way of Jefferson & North Walworth Counties, and many more.

RRCC also receives critical revenue from generous local business donors, individual givers, community outreach, and our annual Tour da Goose fundraiser. Grant writing and outreach for support are constant in order to pull in additional resources, jump-start initiatives, and build financial support.

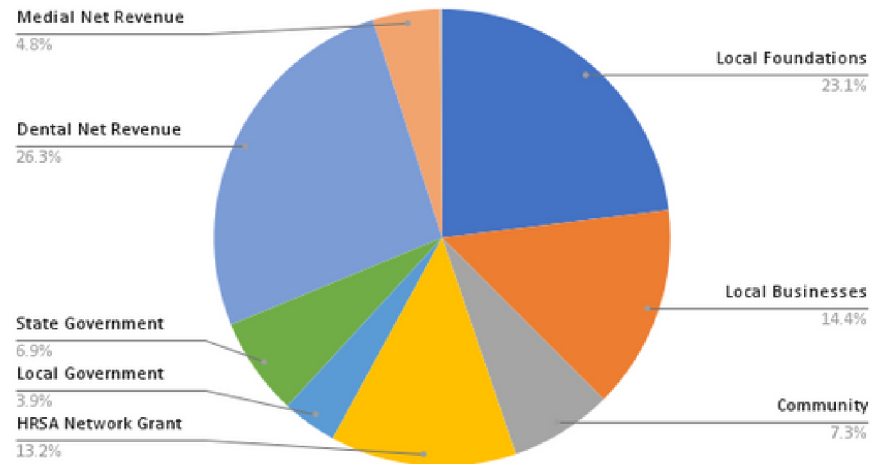

Patient Cost Contributions	2022 Totals
Medical Service Write-offs	\$350,287.09
Dental Service Write-offs	\$1,037,296.73

Our primary expense is, and will continue to be, staffing. RRCC renewed its focus in 2022 on recruiting & maintaining quality healthcare professionals to serve our patients - an initiative that not only requires investment in our mission but providing competitive pay, attractive benefits, and flexible scheduling.

Our team continues to focus on reducing expenses whenever possible without impacting the quality, affordability, or accessibility of patient care.

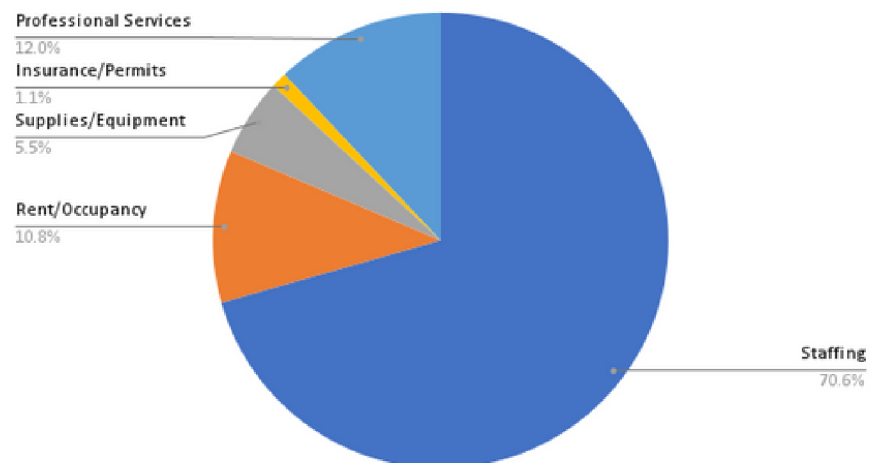

2022 Total Revenue	\$1,802,191

HealthWorks -- A Community Effort

The Rock River Health Care Network (HealthWorks) was formed in 2020 in response to a 3-year federal grant award from the Health Resource and Services Administration (HRSA) Department. **The purpose of this grant award is to increase health equity in Jefferson and Dodge Counties, Wisconsin, specifically focusing on low-income individuals' access to primary care.**

HealthWorks is comprised of eight local organizations that have a long history of collaboration, including

- Fort HealthCare
- Watertown Regional Medical Center
- Greater Watertown Community Health Foundation
- Rainbow Hospice
- Jefferson County Public Health & Human Services Departments
- Watertown Health Department
- Madison Area Technical College
- Rock River Community Clinic

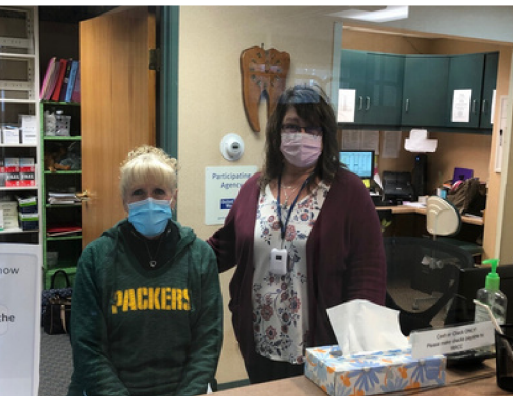

HealthWorks first major project was to assist the RRCC into becoming a FQHC-LAL which was completed in December 2022. By the end of the grant (June 30, 2023), HealthWorks will have allocated over \$680,000 in funding to support RRCC, including \$530,000 in direct reimbursement for operational expenses and \$153,000 to support the Electronic Medical Record (Cerner) expansion with Fort HealthCare.

“HealthWorks recognizes that through supporting RRCC, our goal of community health equity is truly attainable and achievable.”

Kristin Wallace, HealthWorks Network Director

Lead by Christopher Barron, Executive Director of Population Health & Clinical Services at Fort HealthCare, HealthWorks members Olivia Nichols and Kristin Wallace presented at the Wisconsin State Capitol for Wisconsin Hospital Advocacy Day to share the advancements and promise of healthcare collaboration.
